

GLOSTA ENGINEERING

If you have the waste We have the skips

WELCOME TO GLOSTA ENGINEERING

Glosta Engineering is based in the North West of England and has been involved in the design and manufacture of skips and containers since 1973. The company is owned and run by Gary Moore. Gary prides himself that he personally attends to all queries and orders to ensure that all customers receive the best possible service.

We work together with many industries to offer variations of specified and custom-tailored skips and containers. All our products are designed to C.H.E.M. specifications.

Our mission statement is

To provide quality skips and containers to the waste, recycling and reclamation industry to ensure a greener, brighter and cleaner outlook to contribute towards the environmental investment for future generations.

GLOSTA ENGINEERING

If you have the waste We have the skips

TRANSPORT

We can deliver skips and containers directly to your premises. Please enquire of the cost.

We can help you to make the most of your delivery charge by delivering a number and / or variety of skips and containers.

We achieve this by putting smaller skips inside larger ones, and so, your cost per capita is reduced.
